

AQUACHOICE

GREENSTAR

Simply Green: The Revolution of Premium Finishing

The First Waterborne Two Component Lacquer without any Hazard Labelling on Hardener According CLP Legislation

NOW NEW:

- + 18 hours usability after mixing!
- + EC1 certified!
- + R9/R10/R11 certified!
- + Sweat and saliva certified!
- + Toy certified!
- + Sports floor certified!

Berger-Seidle
...wood floors deserve the best!

AQUACHOICE GREENSTAR - The First Waterborne Two Component Lacquer without any Hazard Labelling on Hardener According CLP Legislation

Simply green - this is the revolution of two-component wood floor finishing: By introducing their innovation AQUACHOICE GREENSTAR, Berger-Seidle offer the first **two-component lacquer system completely free of any hazard labelling** on the hardener. Isocyanate or aziridine are avoided completely so that the product does not require any H- and P-statements on the product label. The installer can take advantage of this fact since he can **work without any protective measures normally required for products containing isocyanates**. This constitutes a new level and generation of environmental, user and health protection. In addition, AQUACHOICE GREENSTAR **does not emit any CO₂** gases during reaction as conventional two-component systems do due to their technology.

This is achieved with an entirely new hardener technology developed by Berger-Seidle offering the well-known first-class performance of a two-component waterborne lacquer, for example AQUACHOICE 2KPU, i.e. **highest resistance combined with excellent application properties**.

AQUACHOICE GREENSTAR is also suitable and approved for cork surfaces. Its excellent application properties are comparable with those of high-end products such as AQUACHOICE 2KPU or AQUACHOICE MONOTOP. Furthermore it is certified according to skid resistance rating R9 (BGR 191 and DIN 51130), sweat and saliva norm (DIN 53160), toy norm (DIN EN 71-3) as well as sports flooring (DIN 18032-2).

The extremely long pot life of AQUACHOICE GREENSTAR offers an additional highlight. Whilst traditional two-component waterborne lacquers have to be used up within 2 hours after the two components were mixed, AQUACHOICE GREENSTAR offers a **minimum pot life of 18 hours**, i.e. when the installer resumes his work the next morning, he can **continue with the mixture of the previous evening** – a great advantage facilitating the daily work, saving leftovers and money and reducing environmental pollution.

The Advantages

- + Hardener and finish completely without hazard labelling according CLP legislation
- + Completely without isocyanate or aziridine
- + Requires no isocyanate protection measures
- + No CO₂ gases during reaction
- + Extremely long pot life of 18 hours after mixing
- + Cork floor certified
- + EC1-Certificate
- + Premium product offering top-notch resistance properties
- + Skid resistance level R9 certified acc. DGUV Regel 108-003/BGR 181 and DIN 51130 (R10/R11 also certified with additive)
- + Sweat and saliva certified according DIN 53160
- + Toy certified according DIN EN 71-3
- + Sports floor certified according DIN 18032-2
- + Ideal also for PAK renovation in combination with AQUACHOICE PAK-STOP
